decimal eRT Settings

The following settings are present within the decimal eRT settings UI accessed within the View → Settings menu:

App Settings

- Landing Page
    - Allows the user to specify whether or not to view the application landing page when decimal eRT is opened.
- Inactivity Timeout
    - Specifies the time out period (in minutes) to automatically log the user out of the application. Timeout is based on mouse/keyboard interaction within the user interface. Note: This inactivity timeout is different than the user session token received from the decimal Launcher.
- Default DICOM Directory
    - Sets the default DICOM import directory. This directory will be used each time a DICOM import is attempted.
- UI Theme
    - Set the visual theme of the application (Note: the 'blue' theme is the currently supported theme. The 'dark' theme is a deprecated theme and not routinely updated.
