DICOM Patient Import

Importing a New Patient

If you have a set of Ct Images and structures you can import them directly into a new patient through the "Import Patients" menu.

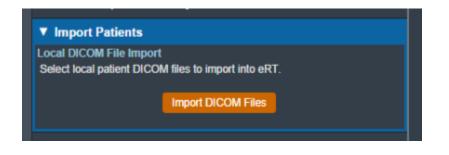

Fig. 1

Selecting the "Import New Patient" option will open the Importing UI.

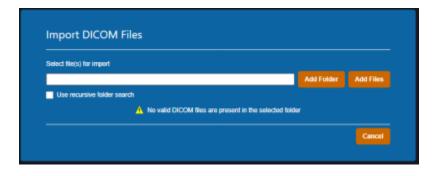

Fig. 2

Here you may either browse your computer or copy the path to the folder that contains the CT images and structures you wish to import.

Then the import will proccess:

	Importing DICOM Files. Please wait	
	supporting brocking rates, i notes white:	
1	Step: Writing Course data to disk (Step 2 of 2)	
	owp. Writing Course data to disk (ovep 2 of 2)	

If there are no Errors while importing you will be taken to a confirmation page for your import.

Patient: :	ECT Nose	
MRN;	Nose	
- POL_2 - POL_3	ving structure(s) have been skipped as they are not closed planar.	
- POL4 - LI Parolic		

Fig. 5

If there are errors please refer to the Common Errors section below.

Common Errors

Missing/Undefined External Structure

If the structure set that is being imported does not have a set external structure you will be directed to select the external from the structure set before the import resumes.

Please refer to and addres	the following error(s):	
	und in the structure set. Please select a structu	re to use as the
external structure.	•	

The drop down menu will have a list of the structures in the imported set. You will be able to select one as the external for this course then confirm your choice by pressing "Set External"

e following error(s):
d in the structure set. Please select a structure to use as the
Set External

Importing an Existing Patient

If the files you have selected to import coincide with the MRN of a patient that already exists in the app you will receive this error.

rrors Found Dur	ing import	
lease refer to and address th	he following error(s):	
Patient MRN already exists	s in database.	
	s in database. Ig course. Please select an option for import.	
Series UID found in existin		Cancel

Fig. 9

You have three options provided to resolve the error:

- 1. Import to a New Course
- 2. Re-Import Structures
- 3. Do Nothing

Import to a New Course

Importing to a new course will simply complete the import but instead of affecting existing courses or plans for the patient the app will create a new course for this patient using the new import.

Re-import Structures

Re-Importing structures can be used if your goal is to update or add structures to your existing patient.

Please refer to and address the following error(s):		
Patient MRN already ex	xists in database.	
Series UID found in exi	isting course. Please select an option for import.	
Reimport Structures	•	
Errors Found D	ouring Import	
Errors Found D		

Fig. 11

After selecting this option you will be presented with a list of the structures in the import.

For each you may select one of three options:

- 1. Do not reimport: skips this structure for the re import.
- 2. Replace existing geometry: replaces the existing structure with the imported one.
- 3. Import as new structure: Imports the structure as brand new not affecting the existing one. Also if the structure does not exist currently it creates it as normal.

lease refer to and address the following erro	w(s):
Patient MRN already exists in database. Series UID found in existing course. Plea Reimport Structures •	se select an option for import.
rrors Found During Impo	rt
lease refer to and address the following erro	vr(s):
ידע	Do Not Reimport
2TV 6840	Do Not Reimport -
tt Parotid	Do Not Reimport 🔹
Cond	Do Not Reimport 🔹
Cond+5	Do Not Reimport 🔹
Ant avoid	Do Not Reimport 🔹
Post avoid	Do Not Reimport •
t Eye	Do Not Reimport 🔹
t Eye	Do Not Reimport 🔹
Diternal	Do Not Reimport 🔹
IOI US 1CM	Do Not Reimport

Once you have made your decision for each structure you must select "Re Import Structures" to finalize your changes.

nose	Do Not Reimport 🔹
90 % (Trial_1)_1	Replace Existing Geometry 🔹
Structure: 90 % (Trial_1)_1	
Electron Bolus	Replace Existing Geometry 🔹
Structure: Electron Bolus	
	Re-Import Structures
	Cancel

Fig. 13

Do Nothing

This is the simplest action, selecting to do nothing will cancel your import and return you to the main menu.
