# Creating a Plan

1. The point has now been reached where a *Plan* can be created
2. Click on the blue *Add Plan* link under the *Patient Model* to create a new plan
    1. In the box that opens the user should name the plan and add any description they may want

    2. Note that the *Base Plan* option is used to specify whether an empty plan should be created or if the new plan should be pre-filled using the selected *Plan Template* (details on *Plan Templates* can be found here)
    3. Click on the blue *OK* button when finished and the *Plan* has been created
3. Open the plan and begin the planning process by clicking on the blue *Open* button next to the new plan
    1. Note that users are free to have as many plans as desired within a the *Patient Model* and each Plan will specify which portion of the Course Prescriptions it is attempting to implement
