# Launching Astroid

The Astroid *Launcher* will house the various applications that will be used as part of the Astroid Treatment Planning system. Any updates to these applications will automatically be deployed to the *Launcher*. The user will be notified that there is an update or a new version that will need installation once they have chosen an application.
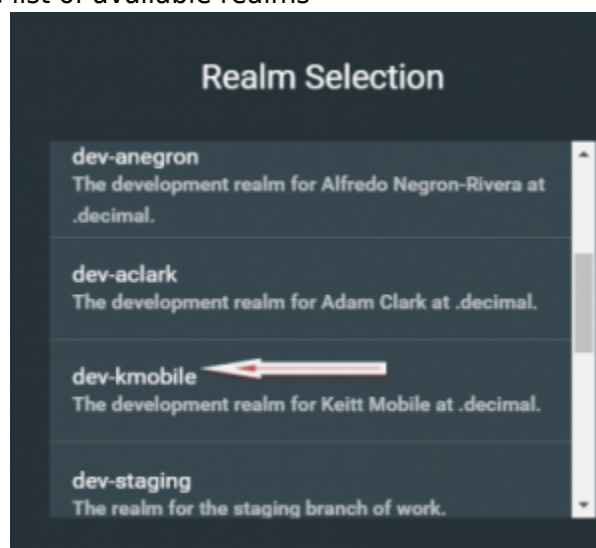

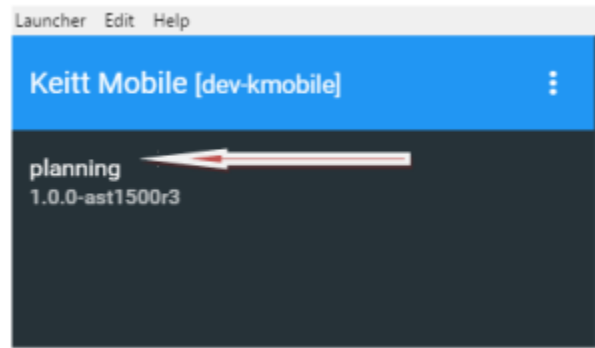

1. Open the *Launcher*
2. Sign in using your user name and password

3. Select the blue *Log In* button
4. Select your realm from the list of available realms

5. From the left side tool bar select the application you would like to launch

6. Select the blue *Launch* button
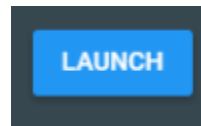

7. If there is an updated version of this application the *Launch* button will say *Install*. Click this and allow the latest version to install. After the latest version is installed the blue button will say *Launch*
8. You may now proceed with opening a current patient or importing a new patient
