

Plan Export

Once a plan has been completed and the physician has approved the plan; the plan is ready to be sent to the Record and Verify system.

- Open the *Export* block.
- The qualified person box must be checked in order to export
- Choose which items to be exported
- Choose the location to export to- either locally or to a server
- When you choose to export locally the user has a choice to anonymize the data by checking the *Anonymize patient data* box under the *DICOM Local Export* option
