2025/12/08 09:14 1/3 Plan History

Plan History

The *Plan History* allows the user to see all changes and modifications made to a plan. Each modification to a plan will result in a new *Revision* of the plan. (note: in a complex plan this may result in hundreds of revisions) If the user is not satisfied with the results of a modification they may go back to any of the previous *Revisions* and make that instance the active instance. (note: this will cause another *Revision* to be created) Below is a walk through and explanation of each step.

- 1. Open the General block from the Plan Overview
- 2. Expand the *History* tree node. The number of plan revisions will be listed. In this below example there are 36 revisions
- 3. Select the More Details option in the bottom right hand corner

4. The summary of the latest revisions will expand to the right

2025/12/08 09:14 2/3 Plan History

- 5. The user should then pick the revision they want to look at by selecting the blue *show*. This will expand that particular version of the plan and explain what was done
 - 1. "op": is the operation performed in this version that differs from the previous version (i.e. delete: an item was deleted)
 - 2. "path": is the item in the treatment plan data that had the operation performed
 - 3. "val": is the value in the path that had the operation performed
- 6. If the user would like to return to this version they may do so by selecting the blue make active
- 7. The use can close the expanded version by selecting the blue hide

```
Revision 36: view make active
created: 2016-10-04 09:21:34
by: Keitt Mobile
summary: hide

{
    op: update,
    path: { captured scope, directive },
    val: {
        some: 57f2736f00c0b9f2c378152e06cfdd09
    }
    }
}

{
    op: update,
    path: [ captured scope, site ],
    val: {
        some: 57dbebec00c0102cd41ea86de124b527
    }
}
```
