

Plan History

The *Plan History* allows the user to see all changes and modifications made to a plan. Each modification to a plan will result in a new *Revision* of the plan (note: in a complex plan there may be hundreds of revisions). If the user is not satisfied with the results of a modification they may go back to any of the previous *Revisions* and make that instance the active instance (note: this will cause another *Revision* to be created for the reversion). Below is a walk through and more detailed explanation of this feature.

1. Open the *General* block from the Plan Overview

The screenshot shows the 'General' section of the Plan Overview. It includes 'Plan Info' (plan name: edit constraints, plan description:), 'IDs' (RKS, ISS), 'Clinical Goals' (79.2 Gy(RBE) to PTV_7920 in 44 fractions), and a 'History' section. The 'History' section is collapsed.

2. The summary of the latest revisions will expand to the right

The screenshot shows the 'General' section of the Plan Overview with the 'History' section expanded. It lists four revisions, each with a 'show' link to view the details.

Revision	action	modified	by	details
Revision 4	active revision	2017-02-08 13:38:36	Koell Meible	show
Revision 3	make active	2017-02-08 11:55:48	Koell Meible	show
Revision 2	make active	2017-02-08 11:55:21	Koell Meible	show
Revision 1	make active	2017-02-08 11:54:48	Koell Meible	show

3. Expand the *History* (this is not mandatory)

1. The number of plan revisions will be listed (In the above example there are 4 revisions)

4. The user can now review the various revision summaries

1. Clicking the blue *show* link will expand that particular version of the plan and explain what was changed
2. “op”: is the operation performed in this version that differs from the previous version (i.e. delete: an item was deleted)
3. “path”: is the item in the treatment plan data that had the operation performed
4. “val”: is the value in the path that had the operation performed

5. If the user would like to return to this version they may do so by clicking the blue *make active* link
6. The user can close the expanded version by clicking the blue *hide* link

Revision 36: [view](#) [make active](#)
created: 2016-10-04 09:21:34
