

# Plan History

The *Plan History* allows the user to see all changes and modifications made to a plan. Each modification to a plan will result in a new *Revision* of the plan (note: in a complex plan there may be hundreds of revisions). If the user is not satisfied with the results of a modification they may go back to any of the previous *Revisions* and make that instance the active instance (note: this will cause another *Revision* to be created for the reversion). Below is a walk through and more detailed explanation of this feature.

1. Open the *General* block from the Plan Overview

2. The summary of the latest revisions will expand to the right

3. Expand the *History* (this is not mandatory)
  1. The number of plan revisions will be listed (In the above example there are 4 revisions)
4. The user can now review the various revision summaries
  1. Clicking the blue *show* link will expand that particular version of the plan and explain what was changed.
  2. “op”: is the operation performed in this version that differs from the previous version (i.e. delete: an item was deleted)
  3. “path”: is the item in the treatment plan data that had the operation performed
  4. “val”: is the value in the path that had the operation performed
5. If the user would like to return to this version they may do so by clicking the blue *make active* link
6. The user can close the expanded version by clicking the blue *hide* link

```
Revision 4: make active
modified: 2017-02-06 10:55:52
by: Keltt Mobile
details: hide
ID: 58989c8800c0f95d8d6498ac484c1a44 copy
{
  op: update,
  path: [ next point id ],
  val: {
    some: 2.0
  }
}
{
  op: insert,
  path: [ points, 1 ],
  val: {
    some: {
      geometry: {
        centroid: {
          snapshot: {
            directive: {
              site: Prostate
            }
          }
        }
      },
      properties: {
        color: {
          b: 1.0,
          g: 128.0,
          r: 255.0
        },
        description: ,
        type: isocenter
      }
    }
  }
}
```
